

### **Iram Haq**

I am a paediatric clinical research fellow currently working within the Children's Research Group at the Institute of Cellular Medicine in Newcastle University. I started my training as a speciality doctor in paediatrics in 2010 and during this time I have developed a clinical interest in paediatric respiratory medicine. This has involved working at the Great North Children's Hospital in Newcastle upon Tyne where I have been involved in looking after children with a range of respiratory problems including acute and chronic asthma. At present, I am carrying out a Wellcome Trust-funded PhD research project at Newcastle University, looking at alternative therapeutic avenues for cystic fibrosis.
