

Dr Jen Townshend

I am a General Paediatrician with a Respiratory Interest at the Great North Children's Hospital.

I trained in the North East of England and New Zealand and completed a Canadian Paediatric Respiratory Fellowship in 2010.

I am the asthma lead for secondary level Paediatrics at the Great North Children's Hospital, and a founding member of the asthma branch of the North East Paediatric Partnership, a group that is promoting shared working across the region for paediatric asthma.

Outside of work I spend my time running around after my 2 children and am a keen cyclist.

I am passionate about what we at BeatAsthma are trying to achieve and believe that by working together we can improve the lives of all children with asthma in our region.
