

Mrs Louise Coverdale

Louise qualified as a registered Children's Nurse in 2004 with a BSc Children's nursing from Coventry University. She has worked in general paediatrics, oncology, haematology, children's emergency medicine, allergy and respiratory services. Louise was the Senior children's research nurse on the 'Learning Early about Peanut Allergy' research study at King's College London and Evelina London between 2009 to 2016.

Currently Louise is a senior children's asthma nurse specialist on secondment from Cambridge University Hospital, working with primary healthcare in the community to help improve outcomes for children and young people with Asthma.

Louise has a Certificate of Advanced Study in Asthma, Allergy and Advanced clinical assessment. Louise has a wealth of experience in allergy, asthma and lung function testing, food challenges, the management of anaphylaxis and acute asthma. Louise has a special interest in the acute management of Asthma and in the health education and symptom management of Asthma.

Louise is an advocate for children and young people with asthma and enjoys helping them to self manage their asthma and find the right treatment options that work for them. Louise is a Nurse representative for the East of England CYP asthma nurses network and offers support to nurses of the network and nurses who maybe new to asthma nursing positions.
